

IN THE CLAIMS:

Please editorially amend claim 6 as follows:

1. (Previously presented) A laminated fabric with a structure in which a face textile is laminated on one side of a durable polymer film with a temporary adhesive layer interposed therebetween and a back textile is laminated on the other side of the durable polymer film with a durable adhesive layer of a water-insoluble adhesive interposed therebetween.

2. (Previously presented) The laminated fabric according to claim 1, wherein the durable polymer film is a waterproof moisture vapor permeable film.

3. (Original) The laminated fabric according to claim 2, wherein the waterproof moisture vapor permeable film is a porous polytetrafluoroethylene film.

4. (Previously presented) The laminated fabric according to claim 3, wherein the inside surface pores of the porous polytetrafluoroethylene film is coated with a water and oil repellent agent.

5. (Original) The laminated fabric according to claim 3, wherein a continuous coating of a hydrophilic resin is provided on one side or both sides of the porous polytetrafluoroethylene film.

6. (Currently Amended) The laminated fabric according to claim 1, wherein the face textile has a weight greater than [that] the weight of the back textile.

7. (Original) The laminated fabric according to claim 1, wherein the face textile is a woven fabric and the back textile is a knitted fabric.

8. (Original) The laminated fabric according to claim 1, wherein the temporary adhesive is a water-soluble adhesive.

Claims 9-15 (Cancelled)

16. (Previously presented) The laminated fabric according to claim 1, wherein the face textile is at least 33 decitex.

17. (Previously presented) The laminated fabric according to claim 1, wherein the face textile is at least 44 decitex.
